University Honors GPA: 3.83/4.0 First Place in the 2026 UMich Data Viz Competition for analyzing the tempo, lyrics, and structure of college fight songs Relevant Coursework: Statistics and Artificial Intelligence, Big Data in Macroeconomics, Linear Regression, Financial Forecasting	

Experience

Rolls-Royce Finance and Controlling Intern	<i>May. 2026 – Aug. 2026</i> <i>Novi, MI</i>
- Engineered 2 interactive Excel dashboards from datasets containing 50,000+ rows, integrating dynamic filtering across product, year, and location to transform multi-year trends in revenue and cost into accessible visual reporting for profit center managers - Developed monthly workforce productivity reports using targeted pivot tables and chained logic in Excel to track department- and employee-level utilization KPIs, delivering insights on labor output to support strategic hiring decisions - Analyzed financial performance for 90+ projects in SAP during month-end closes, auditing and finding root causes for variance anomalies in FSM percentage to ensure complete data integrity across all final corporate financial statements	
University of Michigan Housing Resident Advisor	<i>Jan. 2026 – Present</i> <i>Ann Arbor, MI</i>
- Led community development and resident support for 40+ students, resolving conflicts, facilitating communication, and serving as a trusted resource for navigating campus life - Enforced university policies through timely incident documentation, crisis response, and collaboration with professional staff, balancing accountability with student support	
Automotive Futures Group Research Assistant	<i>Sept. 2023 – May. 2024</i> <i>Ann Arbor, MI</i>
- Generated business insights on sustainability, supply chain optimization, emerging technology, and evolving market dynamics across the automotive sector by analyzing 20 years of industry data from 80+ companies - Conducted industry research by reviewing academic literature, synthesizing findings, preparing reports, incorporating feedback to refine analysis, and proposing next steps for the project’s research direction - Presented original findings through a poster at an annual university-wide undergraduate research symposium, communicating complex analyses to both academic and professional audiences	

Extracurriculars

Solar Car Team Business Analyst	<i>Sept. 2025 – Present</i> <i>Ann Arbor, MI</i>
- Designed and implemented a SQL-based CRM to consolidate, clean, and structure financial data for the team’s 70+ sponsors, improving relationship tracking, data integrity, and downstream reporting consistency - Collaborated cross-functionally with 8 engineering leads on financial planning decisions for the team’s upcoming build cycles by collecting cost estimates and assessing spending priorities - Strengthened the team’s external relationships through structured outreach and strategic engagement with industry organizations	
Model Federal Open Market Committee Competition Chair <i>Jan. 2026 – Present</i>	<i>Sept. 2024 – Present</i> <i>Ann Arbor, MI</i>
- Lead a team of 7 to represent the University of Michigan and compete in the 2026 College Fed Challenge by analyzing macroeconomic conditions, constructing a data-driven narrative, and producing an actionable policy recommendation - Synthesize large-scale numerical datasets from the Federal Reserve Economic Data (FRED) and Bureau of Labor Statistics (BLS) online databases to interpret key economic trends and relationships across indicators	
Vice President of Internal <i>Jan. 2025 – Dec. 2025</i>	
- Built a JavaScript automation tool for Google Sheets to centralize attendance data and improve both data accuracy and reporting reliability, reducing manual processing time by 78% - Directed internal operations for a 71-member organization by scheduling board meetings, sending club communications, and managing internal documentation to standardize and improve information flow
